EDUCATION

KIT - Kalaignarkarunanidhi Institute of Technology, Coimbatore - Tamilnadu, India

2024 – 2028

B. Tech Artificial Intelligence & Data Science, Third Year Current **CGPA: 8.88/10.0**

Coursework: Artificial Intelligence, Computer Networks, Data Structures, Discrete Mathematics, Digital Logic, Fundamentals of Data Science

INTERNSHIP EXPERIENCE

UK Info Tech, Pudukkottai, India

May 2026 - June 2026

Data Analytics Intern – Data Analytics for E-Commerce Database (30 Days)

- Analyzed and interpreted large-scale e-commerce database records across product, customer, and sales dimensions to uncover key trends.
- Built and maintained interactive Power BI dashboards to visualize key business metrics for stakeholder reporting.
- Cleaned and structured raw transactional data spanning multiple tables to improve accuracy and usability for downstream analysis.
- Collaborated with the team over a 30-day internship to translate data insights into clear, actionable recommendations.

PROJECTS

AI Government Scheme Advisor | MERN, Python Flask, scikit-learn, OCR

Dec 2025

- Built a full-stack MERN application with a Python Flask ML microservice to recommend 30+ government welfare schemes to citizens based on eligibility.
- Combined rule-based filtering across 4 eligibility criteria (age, income, category, state) with a Random Forest classifier for a hybrid scoring and ranking system.
- Implemented OCR-based document verification with Tesseract.js and JWT authentication for secure user profiles.
- Added multi-language support (English and Tamil) using i18next for wider accessibility.

Smart School Management System | React, Node.js, Express, MySQL

Mar 2026

- Developed a full-stack School ERP with 3 dedicated portals (Admin, Teacher, Student) using React, Node.js, Express, and MySQL.
- Implemented JWT-based role authentication along with 10+ modules spanning attendance, marks/grade calculation, fees, timetable, and leave management.
- Built features for announcements and complaint handling with a responsive, dark-mode-ready UI.

AI-Powered SaaS CRM System | MERN, Docker, AI/ML

Sep 2025

- Built a production-grade MERN-stack CRM with JWT authentication and role-based access for 3 user roles (Admin, Sales, Support).
- Designed custom AI features including a 0–100 weighted lead-scoring model, a logistic-regression-style deal-closure probability predictor, and a customer churn-risk engine.
- Developed an analytics dashboard with revenue, conversion, and pipeline-health visualizations, with Dockerized deployment.

TECHNICAL SKILLS

C Python C++ JavaScript
DSA MongoDB Express.js React
Node.js MySQL scikit-learn Docker
GitHub Power BI

CERTIFICATIONS & COURSES

NPTEL (IIT Kharagpur) – Programming in Java
(Elite, 77%) 2026
Coursera – Data Visualization with IBM 2025
Responsive Website Basics – HTML, CSS,
JavaScript 2024
Coursera – Introduction to Artificial Intelligence 2025
Coursera – Artificial Intelligence Essentials 2025
ISTE – Level 3 2025
Salesforce – Agent Champion Badge 2025
Salesforce – Agent Innovator Badge 2025
TNWISE – Hackathon Participant 2025

COMPETITIVE PROGRAMMING

LeetCode : Max rating - **1497** | Solved problems: **500+** | Global ranking **327951**

CodeChef : Max rating - **1324** | Solved Problems : **1600+** | Global Rank : **4**

Codeforces : Max rating - **700** | Solved Problems : **7**

ACHIEVEMENTS

- **Solved 50 contest problems** in a 24-hour Hackathon at KIT.
- **Received Academic Star Award** from the AI & DS Department.
- **Earned the Problem Solver Diamond Badge** on CodeChef after solving 1000+ problems; maintained a 100-day coding streak and completed all 500 rating problems with certification.
